Abstract

This paper investigates how insurance education can foster cross-cultural competencies within the context of lifelong learning. With globalization enhancing connections among diverse populations, understanding various cultural contexts becomes vital in the insurance sector. The study explores how incorporating cross-cultural competencies into insurance education can enrich student experiences and boost professional effectiveness.

By analyzing case studies, the research highlights the significance of cultural awareness and communication in navigating global insurance markets. The paper also discusses the challenges and opportunities that arise from cross-cultural interactions in the industry, emphasizing the need for ongoing collaboration among different stakeholders. The paper provides insights and recommendations for educators and practitioners aimed at integrating cross-cultural perspectives into insurance curriculum, emphasizing that lifelong learning is vital for personal and professional development in the insurance field.
